I. INTRODUCTION 1

II. BACKGROUND 1

 A. Litigation History 1

 B. Settlement Terms 3

 C. Notice to the Class, Objections and Exclusions..... 4

 D. Counsel Recommendations on Distribution of Cy Pres Funds..... 5

III. ARGUMENT 6

 A. The Court Should Certify the Proposed Settlement Class 7

 (1) Plaintiffs Satisfy Article III Requirements 7

 (2) The Proposed Settlement Class Meets the Requirements of Rule 23(a) 9

 (3) The Proposed Settlement Class Meets the Requirements of Rule 23(b)(3) 11

 B. The Court Should Reaffirm Appointment of Class Counsel 13

 C. The Proposed Settlement Is Fair, Reasonable, and Adequate 14

 (1) Rule 23(e)(2)(A): The Class Representatives and Class Counsel Have Vigorously Represented the Class 14

 (2) Rule 23(e)(2)(B): Class Counsel Negotiated the Settlement at Arms’ Length 15

 (3) Rule 23(e)(2)(C): The Relief Provided by the Settlements Represents a Strong Recovery, Taking into Account the Costs, Risks, and Delay of Trial and Appeal 17

 (4) Rule 23(e)(2)(D): The Settlements Treat Class Members Equitably Relative to Each Other 22

 (5) The *Cy Pres* Awards Will Further the Underlying Interests of the Statute and of the Absent Class Members 22

 (6) The Reaction of Class Members to the Proposed Settlement Favors Final Approval 24

 D. Plaintiffs Have Provided Adequate Notice Under Rule 23(b)(3) 24

 E. Defendant Has Provided Notice Under the Class Action Fairness Act 25

NOTICE OF MOTION

TO ALL PARTIES AND THEIR COUNSEL OF RECORD:

PLEASE TAKE NOTICE THAT on February 28, 2020 at 10:00 a.m., or as soon thereafter as this matter may be heard, before the Honorable Charles R. Breyer, United States District Court for the Northern District of California, located in Courtroom 6, on the 17th Floor of the San Francisco Courthouse, 450 Golden Gate Avenue, San Francisco, California, Class Counsel Spector, Roseman & Kodroff, PC (“SRK”), Cohen, Milstein, Sellers & Toll PLLC (“CMST”) and Loeff, Cabraser, Heimann & Bernstein, LLP (“LCHB”) will, and hereby do, move the Court pursuant to Federal Rule of Civil Procedure 23 for an order: (1) certifying the proposed Class for settlement purposes under Federal Rule of Civil Procedure 23(a) and (b)(3); (2) affirming appointment of Class Counsel; (3) approving the Settlement as fair, reasonable, and adequate under Federal Rule of Civil Procedure 23(e); (4) directing injunctive relief as agreed in the Settlement; (5) directing distributions to proposed *cy pres* recipients; and (6) dismissing this action with prejudice and directing entry of final judgment.

This motion is based on this Notice of Motion and the supporting Memorandum of Points and Authorities; the Joint Declaration of Jeffrey L. Kodroff, Daniel A. Small, and Michael W. Sobol in Support of this motion (the “Joint Declaration”); papers filed in support of preliminary approval; papers filed in support of Plaintiffs’ motion for attorneys’ fees, expenses, and service awards; any oral argument by counsel at the hearing before this Court; any papers filed in reply; and all other papers and records in this matter.¹

¹ Capitalized terms in the supporting memorandum shall have the same meaning and use as specified in the Class Action Settlement Agreement (the “Settlement”) (Dkt. 166-1, Ex. A). In accordance with the Court’s Order Granting Preliminary Approval of Class Action Settlement, (the “Preliminary Approval Order”), (Dkt. 178), ¶22, a copy of this motion and supporting memorandum will be uploaded within 24 hours of this filing to the settlement website, <http://www.streetviewsettlement.com>.

MEMORANDUM OF POINTS AND AUTHORITIES

I. INTRODUCTION

Named Plaintiffs seek final approval of a settlement that will resolve nearly a decade of litigation against Defendant Google, LLC under Title III of the Omnibus Crime Control and Safe Streets Act of 1968, as amended by the Electronic Communications Privacy Act of 1986, 18 U.S.C. §§2510, *et seq.* (together, “ECPA”). Plaintiffs allege that between 2007 and 2010, Google, using its Street View vehicles program, intentionally intercepted and stored electronic communications transmitted by Class Members over unencrypted wireless internet connections. *See* Dkt. 54 ¶¶ 1-4.

The proposed settlement was preliminarily approved by this Court on October 9, 2019. Dkt. 178. Since that time, an expert notice administrator has ensured that court-approved notice materials were presented more than 560 *million* times to potential Class Members. Young Decl. ¶ 5. As of November 25, 2019, only one exclusion and no objections have been received. *Id.* ¶¶ 11-12. This response affirms the fundamental fairness of the proposed settlement, which ensures meaningful injunctive relief for the class and advances the purposes of the suit and the statute by providing *cy pres* awards to protect and promote Internet privacy. *See generally* Dkt. 166-1 Ex. A (“Agmt.”).

The Court should certify the settlement class as proposed under Rule 23(a) and (b)(3) and grant final approval to the proposed settlement as “fair, reasonable, and adequate” under Rule 23(e).

II. BACKGROUND

A. Litigation History

By summer of 2010, eight putative class actions had been filed in six jurisdictions alleging various claims against Google for unlawful use of Street View vehicles to collect private information. The United States Judicial Panel on Multidistrict Litigation consolidated these actions in this Court before Judge Ware. Dkt. 1. After a competitive briefing process involving submissions from three separate groups of proposed interim class counsel, the Court appointed Jeffrey Kodroff of Spector Roseman & Kodroff, P.C. and Daniel Small of Cohen Milstein Sellers & Toll PLLC as interim co-lead counsel. Dkt. 47, at 2-3. The Court appointed Elizabeth Cabraser of Lieff Cabraser Heimann & Bernstein, LLP as interim liaison counsel. *Id.* at 4.

Counsel filed a Consolidated Class Action Complaint (“CCAC”) on behalf of twenty-two

1 named plaintiffs on November 8, 2010. Dkt. 54, ¶¶ 18-38. The CCAC alleges that Google
2 intercepted the named plaintiffs’ private communications in violation of the ECPA, California
3 Business and Professional Code § 17200 *et seq.* (the “UCL”), and thirteen state wiretap statutes. *Id.*
4 ¶¶ 128-145. Defendants moved to dismiss the CCAC in its entirety. Dkt. 60. The Court dismissed
5 the state wiretap claims as preempted by federal law, and the UCL claims as failing to meet the
6 UCL’s heightened standing requirements. Dkt. 82, at 25. The Court denied Defendants’ motion as to
7 the ECPA claims. *Id.* At Google’s request, the Court certified its decision for immediate appeal, and
8 the Ninth Circuit accepted the certification “because the district court resolved a novel question of
9 statutory interpretation.” Dkt. 90; *Joffe v. Google, Inc.*, 746 F.3d 920, 924 (9th Cir. 2013).

10 On appeal, the Ninth Circuit affirmed this Court and denied rehearing *en banc*, affirming for
11 the first time that data transmitted over unencrypted Wi-Fi networks is not “readily accessible to the
12 general public” and exempt from the ECPA under 18 U.S.C. § 2511(2)(g)(i). *Id.* at 936. The
13 Supreme Court denied Google’s petition for *certiorari*, United States Sup. Ct. Dkt. 13-1181.

14 The case proceeded with an initial period of limited discovery devoted to the issue of
15 standing. Dkt. 108. On September 19, 2014, the Court appointed a Special Master to conduct a set of
16 complex technical searches on data collected by Google. Dkt. 121; Dkt. 121-1. The Special Master’s
17 charge was “to search the Street View Data to determine whether any Plaintiff’s communications
18 were acquired by Google.” Dkt. 121-1 at 2. But, as the Court explained, “the Street View Data is not
19 susceptible to a simple keyword search, and instead requires Plaintiffs to study the data, review
20 search results, and develop new strategies based on what they find or what they learn about the
21 data.” Dkt. 121 at 2 (internal quotations omitted). To that end, the Special Master was provided with
22 access to Google’s collected Street View data, which contain more than 3 *billion* “frames” of
23 wireless raw data, of which approximately 300 million contain “Payload Data”—the kinds of frames
24 that could contain the contents of communications. *See* Joint Decl. ¶ 19.

25 Over the next three years, the parties coordinated with the Special Master to put the massive
26 database in searchable form and then to search for data that would show whether Google had
27 intercepted communications from the Named Plaintiffs. *Id.* Eighteen Named Plaintiffs provided
28 personal information and forensic evidence of their Wi-Fi equipment, including MAC addresses,

1 email addresses, and SSIDs. *Id.* Even though these searches were focused only on the 18 Named
 2 Plaintiffs, the process proved difficult and time-consuming. It was not until December 2017 that the
 3 Special Master filed a report under seal setting out the results of his review. *Id.*

4 On February 1, 2018, with the benefit of years of factual investigation, legal research, and the
 5 Special Master’s findings, the parties mediated before the respected and skilled mediator Greg
 6 Lindstrom of Phillips ADR Enterprises P.C. *Id.* ¶ 20. The parties continued settlement negotiations
 7 with the aid of the mediator in the succeeding months, reaching agreement and executing a final
 8 Settlement Agreement on June 11, 2018. *Id.* On June 19, 2018, the Court stayed proceedings in the
 9 case until after the United States Supreme Court issued an opinion in *Frank v. Gaos*, No. 17-961,
 10 which had been granted *certiorari*. Dkt. 155. The Supreme Court issued an opinion in *Gaos* in
 11 March 2019, and Plaintiffs moved for preliminary approval of the settlement and certification of a
 12 settlement class on July 19, 2019, which the Court granted on October 9, 2019. Dkts. 166, 178.

13 **B. Settlement Terms**

14 The Settlement Agreement provides for a single Settlement Class, defined as follows:

15 “Class” means all persons who used a wireless network device from
 16 which Acquired Payload Data was obtained.

17 “Acquired Payload Data” means the Payload Data acquired from
 18 unencrypted wireless networks by Google’s Street View vehicles
 operating in the United States from January 1, 2007 through May 15,
 2010.

19 Agmt. ¶¶ 2, 5.²

20 Under the Settlement Agreement, Google will pay \$13 million into a Settlement Fund which
 21 will (after payment of approved attorneys’ fees, approved Plaintiff service awards, the costs of class
 22 notice and settlement administration, and reimbursement of approved expenses) be used to fund
 23 Court-approved *cy pres* awards to “independent organizations with a track record of addressing
 24 consumer privacy concerns,” who will use the awards “to promote the protection of Internet
 25

26 ² Exclusions apply, e.g., for Google, its employees, and the Court. *See* Agmt. ¶ 7. The class has
 27 been modified from the class pled in the CCAC to reflect the date range of the challenged conduct
 and to limit the class to individuals whose “Payload Data” was collected, targeting the “contents” of
 28 electronic communications targeted by the ECPA. Joint Decl. ¶ 22.

1 privacy.”³ Agmt. ¶ 29; *see id.* ¶¶ 16, 21, 24. None of the Settlement Fund will revert to Google. *Id.* ¶
 2 53. As part of the Agreement, Google represents that funds distributed to *cy pres* recipients through
 3 the Settlement Fund are in addition to its charitable giving and would not have been expended absent
 4 the Settlement. *Id.* ¶ 25. Google did not select any of the proposed *cy pres* recipients; though
 5 Plaintiffs disclosed their proposed recipients per the Agreement, no changes to proposed recipients
 6 were made in response to Google’s views. *See id.* ¶ 29; Joint Decl. ¶ 24.

7 The settlement also includes both corrective and forward-looking injunctive relief. To protect
 8 Class Members who were affected by Google’s conduct, the Settlement Agreement requires Google
 9 to destroy Acquired Payload Data within 45 days (subject to preservation obligations to Excluded
 10 Class Members). Agmt. ¶ 33. Google also will “not collect and store for use in any product or
 11 service Payload Data via Street View vehicles, except with notice and consent”; and will comply
 12 with the privacy program and other requirements of the Assurance of Voluntary Compliance Google
 13 entered into in 2013 with various state Attorneys General regarding its Street View vehicles. *Id.* ¶¶
 14 34-35. The latter provision extends the duration of the Assurance by nearly two years. *See* Joint
 15 Decl. Ex. F ¶ II-2. Google will also “host and maintain educational webpages that instruct users on
 16 the configuration of wireless security modes and the value of encrypting a wireless network.” Agmt.
 17 ¶¶ 36-37. This measure will help Class Members (and others) avoid the vulnerability of an
 18 unencrypted wireless network—the vulnerability at issue in this case.

19 In exchange for the relief described, upon final approval Plaintiffs and Class Members will
 20 release all claims “arising out of or related to the allegations in the [CCAC], including but not
 21 limited to the claims arising out of or related to the allegations in the [CCAC] that have been
 22 asserted or could have been asserted” by Plaintiffs and the other Class Members. *Id.* ¶¶ 17, 46.

23 C. Notice to the Class, Objections and Exclusions

24 Pursuant to the Court’s approved notice plan, Notice Administrator A.B. Data began
 25 disseminating notice on October 22, 2019. Young Decl. ¶ 5. Notice included: a settlement website⁴

26
 27 ³ In contrast, the state attorneys general in their companion Street View litigation negotiated a
 \$7 million payment to the states as part of their settlement with Google. Joint Decl. Ex. F at 6-7.

28 ⁴ www.streetviewsettlement.com.

1 presenting the Court-approved Long Form Notice, as well as other Court documents and answers to
2 frequently asked questions; an email account and P.O. Box to which potential Class Members could
3 submit questions; a toll-free number with an automated interactive voice response system that
4 presented information concerning the settlement; a live operator with whom potential Class
5 Members could speak during business hours; news releases in English and Spanish distributed to
6 more than 10,000 newsrooms via *PR Newswire*; and a concentrated ad blitz calculated to reach more
7 than 70% of the target audience. *See* Young Decl. ¶¶ 6-8, 10, 14. This campaign was appropriately
8 targeted to reach as many members as practicable of a proposed class whose members are not readily
9 identifiable, but whose unencrypted wireless Payload Data were captured by Street View vehicles
10 between 2007 and 2010. Young Decl. ¶ 3; Joint Decl. ¶ 25.

11 The advertising program delivered more than 560 million ad impressions to potential Class
12 Members. Young Decl. ¶ 5. The Settlement Website will remain active for at least 30 days after final
13 approval, but as of filing it had received 122,954 unique hits. *Id.* ¶ 10. The administrator has
14 received 12 emails and 41 phone calls. *Id.* ¶ 10.

15 Though Class Members may exclude themselves or object to the settlement through January
16 20, 2020, to date only one exclusion and no objections have been received. *Id.* ¶¶ 11-12.

17 **D. Counsel Recommendations on Distribution of Cy Pres Funds**

18 At preliminary approval, Plaintiffs proposed eight non-profit groups as potential recipients of
19 *cy pres* awards: The Center on Privacy & Technology at Georgetown Law, Center for Digital
20 Democracy, MIT's Internet Policy Research Initiative, World Privacy Forum, Public Knowledge,
21 Rose Foundation for Communities and the Environment, American Civil Liberties Foundation, Inc.;
22 and Consumer Reports, Inc. Dkt. 166 at 6. Their proposals were submitted to the Court and posted
23 on the Settlement Website for all Class Members to review and comment on. *Id.*, Dkt. 166-1 Exs. B-
24 I; Young Decl. ¶ 6. The Court also granted the Electronic Privacy Information Center ("EPIC")
25 leave to apply for a *cy pres* award. Dkt. 174. Its proposal was posted on the Settlement Website.
26 Young Decl. ¶ 6. As of filing no comments on the proposed *cy pres* recipients have been received.
27 *Id.* ¶ 12.

28 The Settlement Agreement provides that the Court will have the final word on *cy pres*

1 recipients. Agmt. ¶ 11. Plaintiffs, however, must propose *cy pres* recipients to the Court, and their
 2 respective amounts of the Net Settlement Fund. *Id.* ¶ 32. Accordingly, Plaintiffs recommend that the
 3 Court authorize distributions from the Net Settlement Fund as follows:

Organization	Recommended Amount
Center on Privacy & Technology at Georgetown Law	\$1,100,000
Center for Digital Democracy	\$500,000
MIT Internet Policy Research Initiative	\$1,399,710
World Privacy Forum	\$500,000
Public Knowledge	\$907,500
American Civil Liberties Union Foundation	\$1,170,000
Consumer Reports	\$969,249
Rose Foundation for Communities and the Environment	<i>Remainder</i> ⁵

 13
 14 Counsel make no recommendation as to the proposal submitted by EPIC, but note that
 15 EPIC's contributions regarding the issues in this litigation have been substantial.⁶

16 **III. ARGUMENT**

17 To determine whether to approve a class action settlement, the Court must first assure itself
 18 that the proposed settlement class may be certified under Rule 23(a) and (b); next the Court must
 19 assess whether the proposed settlement is "fair, reasonable, and adequate." *See Hanlon v. Chrysler*
 20 *Corp.*, 150 F.3d 1011, 1019, 1022, 1025 (9th Cir. 1998) *overruled on other grounds*; *see also In re*
 21

22 ⁵ Plaintiffs do not currently know the amount of the Net Settlement Fund (i.e., the amount of the
 23 \$13 million that will remain after payment of court-approved fees, expenses and service awards).
 24 Nor do plaintiffs know the amount the Court will award to EPIC. Thus, Plaintiffs propose to award
 25 the Rose Foundation the remainder of the Net Settlement Fund, to be sure that the fund is exhausted.
 For purposes of illustration, if the Court awarded the amounts proposed for the other seven *cy pres*
 recipients, which total \$6,546,459, and awarded \$4,249,500 in fees, expenses and service awards,
 then \$2,204,041, minus the amount awarded to EPIC, would be available for the Rose Foundation.

26 ⁶ Plaintiffs did not propose EPIC as a *cy pres* recipient in their preliminary approval motion;
 27 because the Court approved EPIC's motion to apply for *cy pres* funding, Plaintiffs hereby disclose
 28 that EPIC submitted an *amicus* brief in support of Plaintiffs during Google's appeal earlier in the
 case. EPIC also received *cy pres* settlement funds in *Perkins v. LinkedIn Corp.*, No. 13-CV-04303-
 LHK (N.D. Cal.), a case in which Lieff Cabraser Heimann and Bernstein served as Lead Counsel.

1 *Volkswagen “Clean Diesel” Mktg., Sales Practices, and Prods. Liab. Litig.*, 229 F. Supp. 3d 1052,
2 1062 (N.D. Cal. 2017) (“*Volkswagen II*”) (Breyer, J.).

3 **A. The Court Should Certify the Proposed Settlement Class**

4 At final approval, Plaintiffs must show that the requirements of Rule 23(a) and 23(b)(3) are
5 met. *Amchem Prods., Inc. v. Windsor*, 521 U.S. 591, 619-22 (1997). “The district court’s Rule 23(a)
6 and (b) analysis must be ‘rigorous,’” but “[t]he criteria for class certification are applied differently
7 in litigation classes and settlement classes.” *In re Hyundai and Kia Fuel Economy Litig.*, 926 F.3d
8 539, 556 (9th Cir. 2019) (quoting *Comcast Corp. v. Behrend*, 569 U.S. 27, 33 (2013)). In deciding
9 whether to certify a settlement class, a district court need not consider “manageability at trial”
10 because no trial will proceed, but must “give heightened attention to the definition of the class or
11 subclasses” to protect absentees. *Id.* at 556-557. Before certifying a class, courts must also “assure
12 [them]selves of litigants’ standing under Article III,” and may not certify a class unless at least one
13 named plaintiff has properly alleged standing. *Frank v. Gaos*, 139 S. Ct. 1041, 1046 (2019).

14 **(1) Plaintiffs Satisfy Article III Requirements**

15 Article III standing requires that named plaintiffs “must have (1) injury in fact; (2) that is
16 fairly traceable to the challenged conduct of the defendant, and (3) that is likely to be redressed by a
17 favorable judicial decision.” *Spokeo, Inc. v. Robins*, 136 S. Ct. 1540, 1547 (2016) (citing *Lujan v.*
18 *Defenders of Wildlife*, 504 U.S. 555, 560-61 (1992)). “To establish injury in fact, a plaintiff must
19 show that he or she suffered ‘an invasion of a legally protected interest’ that is ‘concrete and
20 particularized’ and ‘actual or imminent, not conjectural or hypothetical.’” *Id.* at 1548 (quoting *Lujan*,
21 504 U.S. at 560). “[N]amed plaintiffs who represent a class ‘must allege and show that they
22 personally have been injured, not that injury has been suffered by other, unidentified members of the
23 class to which they belong.’” *Id.* at 1547 n.6 (quoting *Simon v. Eastern Ky. Welfare Rights Org.*, 426
24 U.S. 26, 40 n.20 (1976)). At the pleading stage, standing is analyzed taking the allegations of the
25 complaint as true.⁷ *See id.* at 1547; *Warth v. Seldin*, 422 U.S. 490, 501-02 (1975).

26 _____
27 ⁷ At class certification, courts also examine standing taking the allegations of the pleadings as
28 true. *See Gaos*, 139 S. Ct. at 1046 (remanding because “no court in this case has analyzed whether
any named plaintiff has *alleged* SCA violations that are sufficiently concrete and particularized to

1 Here, the Court can rely on Plaintiff’s allegations to establish standing. Each Named Plaintiff
 2 alleged that Google intentionally intercepted their electronic communications in violation of the
 3 ECPA, 18 U.S.C. § 2511(1)(a). See Dkt. 54 ¶¶ 18-38. Under the ECPA, an interception involves the
 4 “acquisition of the contents of any wire, electronic, or oral communication through the use of any
 5 electronic, mechanical, or other device.” 18 U.S.C. § 2510(4). Named Plaintiffs all alleged that
 6 Google’s Street View vehicles “surreptitiously collected, decoded, and stored data from [their] WiFi
 7 connection, including payload data,” and that they “did not know that Google collected [t]his data,
 8 nor did [they] give permission for Google to do so.” Dkt. 54 ¶¶ 18-38. The alleged injuries are
 9 concrete, fairly traceable to the actions of the defendant, and redressable by this Court.

10 Courts have sometimes struggled with standing’s concreteness inquiry when plaintiffs allege
 11 “intangible” harms. *See Spokeo*, 136 S. Ct. at 1549. “In determining whether an intangible harm
 12 constitutes injury in fact, both history and the judgement of Congress play important roles. . . . [I]t is
 13 instructive to consider whether an alleged intangible harm has a close relationship to a harm that has
 14 traditionally been regarded as providing a basis for a lawsuit in English or American courts. . . . In
 15 addition, because Congress is well positioned to identify intangible harms that meet minimum
 16 Article III requirements, its judgment is also instructive and important.” *Id.* at 1549.

17 In enacting the ECPA, Congress acted to protect the concrete privacy interests of individuals
 18 in avoiding unwanted interception of their electronic communications. As with many privacy-related
 19 claims, the violation lies in the *invasion* of a plaintiffs’ privacy, rather than in material harm flowing
 20 therefrom. *See* Restatement (Second) of Torts § 652B cmt. b (1977) (“The intrusion itself makes the
 21 defendant subject to liability, even though there is no publication or other use of any kind of the
 22 photograph or information outlined.”). The prohibition outlined in the statute, and its accompanying
 23 private cause of action in 18 U.S.C. § 2520, reflect the considered judgment of Congress that

24
 25 _____
 26 support standing.”) (emphasis added); *In re: Google Inc. Cookie Placement Consumer Privacy*
 27 *Litig.*, 934 F.3d 316, 324-25 (3d Cir. 2019) (reviewing allegations to determine standing); *In re*
 28 *Deepwater Horizon*, 739 F.3d 790, 805-06 (5th Cir. 2014) (rejecting objections about need to
 conduct “evidentiary inquiry into [] Article III standing . . . during class certification and settlement
 approval” and finding standing based on pleadings).

1 intentional, nonconsensual interception of private communications is an invasion of individuals’
 2 right to privacy.⁸ This congressional judgment is “instructive and important” in establishing the
 3 existence of a concrete injury under Article III. *Spokeo*, 136 S. Ct. Id. at 1549.

4 That is why courts have routinely—apparently uniformly—held that violations of the ECPA
 5 constitute concrete and particularized harms that give rise to Article III standing. *See, e.g., In re*
 6 *Nickelodeon Consumer Privacy Litig.*, 827 F.3d 262, 273-74 (3d Cir. 2016); *Rackemann v. LISNR,*
 7 *Inc.*, 2017 WL 4340349, at *3-5 (S.D. Ind. Sept. 29, 2017); *Matera v. Google Inc.*, 2016 WL
 8 5339806, at *14 (N.D. Cal. Sept. 23, 2016). Even courts that dismissed cases on the merits have
 9 recognized that ECPA complainants have Article III standing. *See, e.g., Nickelodeon*, 827 F.3d at
 10 273-76; *Cooper v. Slice Techs., Inc.*, 2018 WL 2727888, at *2-5 (S.D.N.Y. June 6, 2018); *In re*
 11 *Facebook Internet Tracking Litig.*, 263 F. Supp. 3d 836, 841-42, 844-45 (N.D. Cal. 2017).

12 So too here, because Plaintiffs have plausibly alleged that Google intercepted private
 13 communications transmitted in the “payload data” of Named Plaintiffs’ wireless internet traffic (Dkt.
 14 54 ¶¶ 18-38), they have alleged what is necessary for Article III standing. Those allegations establish
 15 this Court’s jurisdiction to approve the parties’ settlement.

16 **(2) The Proposed Settlement Class Meets the Requirements of Rule 23(a)**

17 Under Rule 23(a), the proponent of class certification must show that the proposed class
 18 meets the requirements of (1) numerosity, (2) commonality, (3) typicality, and (4) adequacy. *In re*
 19 *Volkswagen “Clean Diesel” Mktg., Sales Practices, and Prods. Liab. Litig.*, 2017 WL 672727, at
 20 *12 (N.D. Cal. Feb. 16, 2017) (Breyer, J.) (“*Volkswagen I*”).⁹ Those requirements are met here.

21 The numerosity requirement is satisfied. Discovery has shown that Google collected nearly
 22 300 million payload data frames in the United States over the course of its Street View program.
 23 Joint Decl. ¶ 27. Class membership in this case likely runs into the millions, making joinder
 24

25 ⁸ *See* S. Rep. No. 99-541 at 5 (1986), *as reprinted in* 1986 U.S.C.C.A.N. 3555, 3559 (“[T]he
 26 law must advance with the technology. . . . Privacy cannot be left to depend solely on physical
 protection, or it will gradually erode as technology advances.”).

27 ⁹ *Volkswagen I* is a decision on preliminary approval. *Id.* at 1. At final approval, the Court relied
 28 on the class certification analysis presented in *Volkswagen I*, cited here. *See Volkswagen II*, 229 F.
 Supp. 3d at 1063.

1 impracticable. *Id.*; see Fed. R. Civ. P. 23(a)(1); *In re Abbot Labs. Norvir Anti-trust Litig.*, 2007 WL
2 1689899, at *6 (N.D. Cal. June 11, 2007) (holding that numerosity may be satisfied where class
3 membership is unknown but common sense indicates that it is large).

4 Numerous questions of law and fact are common to the class, satisfying the commonality
5 requirement. Fed. R. Civ. P. 23(a)(2); *Hanlon*, 150 F.3d at 1019; *Wal-Mart Stores, Inc. v. Dukes*,
6 564 U.S. 338 (2011). Among the issues common to the class are (1) whether Google “intercepted”
7 the “contents” of “electronic communications” within the meaning of the ECPA; (2) whether any
8 interception was “intentional” within the meaning of the Act; and (3) whether payload data
9 transmitted over unencrypted networks is “readily accessible to the general public,” within the
10 meaning of the Act. These issues, which are common to each class member’s claim, arise from a
11 common course of conduct by Google. See *Volkswagen I* at 12. Commonality is satisfied.

12 To satisfy the typicality requirement, named plaintiffs’ claims must be “typical of the claims
13 . . . of the class.” Fed. R. Civ. P. 23(a)(3). “[R]epresentative claims are ‘typical’ if they are
14 reasonably coextensive with those of absent class members; they need not be substantially identical.”
15 *Parsons v. Ryan*, 754 F.3d 657, 685 (9th Cir. 2014) (quoting *Hanlon*, 150 F.3d at 1020). “The test of
16 typicality is ‘whether other members have the same or similar injury, whether the action is based on
17 conduct which is not unique to the named plaintiffs, and whether other class members have been
18 injured by the same course of conduct.’” *Id.* (quoting *Hanon v. Dataproducts Corp.*, 976 F.2d 497,
19 508 (9th Cir. 1992)). Here, the named plaintiffs and the class press the same claims and share similar
20 injuries—violations of privacy rights—all flowing from the same alleged conduct by Google.

21 Finally, the representative parties must “fairly and adequately protect the interests of the
22 class.” Fed. R. Civ. P. 23(a)(4). This inquiry asks (1) whether “the named plaintiffs and their counsel
23 have any conflicts of interest with other class members”; and (2), “will the named plaintiffs and their
24 counsel prosecute the action vigorously on behalf of the class?” *Hanlon*, 150 F.3d at 1020.

25 The interests of the named plaintiffs and their counsel are aligned with the interests of the
26 class, and no conflict exists. Here, “each potential plaintiff has the same problem:” Google allegedly
27 intercepted payload data from their unencrypted Wi-Fi connections. *Cf. id.* at 1021. “Potential
28 plaintiffs are not divided into conflicting discrete categories,” and all have aligned interests in

1 pursuing relief from Google and preventing similar invasions in the future. *Cf. id.*

2 Moreover, Class Counsel have prosecuted this action vigorously and capably for nearly a
3 decade. Plaintiffs' interim co-lead counsel and liaison counsel were originally appointed as part of a
4 competitive application process in 2010. Joint Decl. ¶ 8. Since that time, they have undertaken the
5 responsibilities assigned to them by the Court and vigorously prosecuted this action, guiding the case
6 through intensely contested motion practice, a successful appeal, years of jurisdictional discovery,
7 and months of mediation. Class counsel have extensive experience litigating and settling class
8 actions, including large consumer cases. *See* Joint Decl. ¶ 64 & Exs. D, E. Class Counsel's efforts
9 have uncovered sufficient information to assess the strengths and weaknesses of the case, and to
10 negotiate a settlement that balances the benefits of a settlement against the risks of further litigation.
11 Joint Decl. ¶ 20. Throughout administration of the settlement, Class Counsel will continue to
12 vigorously represent the interests of the Class. *Id.* ¶ 26. Plaintiffs and Class Counsel have fairly and
13 adequately protected the interests of all Settlement Class Members and will continue to do so.

14 The Settlement Class meets all the requirements of Rule 23(a).

15 **(3) The Proposed Settlement Class Meets the Requirements of Rule 23(b)(3)**

16 Under Rule 23(b)(3), the Court may certify a class when it finds that “the questions of law or
17 fact common to class members predominate over any questions affecting only individual members,
18 and that a class action is superior to other available methods for fairly and efficiently adjudicating
19 the controversy.”

20 ***a) Common Issues Predominate Over Individual Ones***

21 The predominance inquiry “tests whether proposed classes are sufficiently cohesive to
22 warrant adjudication by representation.” *Hyundai*, 926 F.3d at 557 (quoting *Amchem*, 521 U.S. at
23 623). It “focuses on whether the ‘common questions present a significant aspect of the case and they
24 can be resolved for all members of the class in a single adjudication’; if so, ‘there is clear
25 justification for handling the dispute on a representative rather than on an individual basis.’” *Id.*
26 (quoting *Hanlon*, 150 F.3d at 1022). In this analysis, “more important questions apt to drive the
27 resolution of litigation are given more weight in the predominance analysis over individualized
28 questions which are of considerably less significance to the claims of the class.” *Id.* (quoting *Torres*

1 *v. Mercer Canyons, Inc.*, 855 F.3d 1125, 1134 (9th Cir. 2016).

2 Here, as in the consumer fraud cases highlighted in *Hyundai*, the predominance requirement
 3 is “readily met” because the class is a “cohesive group of individuals [who] suffered the same harm
 4 in the same way because of [Google’s] alleged conduct.” *Hyundai*, 926 F.3d at 559. The central facts
 5 of the case are common to the class—the course of conduct pursued by Google—and the key
 6 questions of law are also common—whether Google’s course of conduct violated the ECPA.
 7 Google’s alleged conduct applies equally “to all Class Members’ claims,” and Class Members
 8 suffered “a common and unifying injury” therefrom. *See Volkswagen I* at 14.

9 Notably, a settlement class may be certified even where the class would not be certified for
 10 litigation “if the settlement obviates the need to litigate individualized issues that would make a trial
 11 unmanageable.” *Hyundai*, 926 F.3d at 558. The class proposed here consists of consumers whose
 12 payload data was collected by Street View vehicles in a common, nationwide scheme. However, to
 13 the extent that individual issues would have been presented at trial regarding Google’s conduct with
 14 respect to individual members or their payload data, the settlement means that those individual
 15 issues will not be tried and thus will not create any manageability problem.¹⁰

16 ***b) Class Treatment Is Superior to Other Methods of Adjudication***

17 “The purpose of the superiority requirement is to assure that the class action is the most
 18 efficient and effective means of resolving the controversy.” *Wolin v. Jaguar Land Rover N. Am.,*
 19 *LLC*, 617 F.3d 1168 (9th Cir. 2010) (quoting 7AA Charles Wright, Arthur Miller & Mary Kay Kane,
 20 *Federal Practice and Procedure* §1779 at 174 (3d ed. 2005)). In considering whether class treatment
 21 is superior, “matters pertinent to [this] finding[] include: (A) the class members’ interests in
 22 individually controlling the prosecution or defense of separate actions; (B) the extent and nature of
 23 any litigation concerning the controversy already begun by or against class members; (C) the
 24 desirability or undesirability of concentrating the litigation of the claims in the particular forum; and
 25 (D) the likely difficulties in managing a class action.” Fed R. Civ. P. 23(b)(3).

26
 27
 28 ¹⁰ Even at trial, the common issues relating to Google’s uniform practice of intercepting and storing unencrypted wireless communications would have predominated over any individual issues.

1 As noted above, the class here is potentially comprised of millions of individuals. It would be
2 completely impracticable to litigate each class member's claim separately without exhausting the
3 entire capacity of the federal judiciary. Individual lawsuits present "the possibility of inconsistent
4 rulings and results," further militating toward class treatment. *Volkswagen I* at 14. Rule 23's
5 "matters pertinent" weigh in favor as well—any individual seeking to pursue the suit on their own
6 would have to relitigate a considerable portion of a decade's worth of progress—particularly
7 difficult jurisdictional discovery for individuals. And because the case has settled no "likely
8 difficulties in managing a class action" exist. Individual litigations would be a monumentally
9 inefficient undertaking. *See Wolin*, 617 F.3d at 1175. Class treatment is superior.

10 The requirements of Rule 23 are met. The Court should certify the class.

11 **B. The Court Should Reaffirm Appointment of Class Counsel**

12 Federal Rule of Civil Procedure 23(c)(1)(B) states that "[a]n order certifying a class
13 action . . . must appoint class counsel under Rule 23(g)." Rule 23(g)(1)(A) requires the Court to
14 consider: "(i) the work counsel has done in identifying or investigating potential claims in the action;
15 (ii) counsel's experience in handling class actions, other complex litigation, and claims of the type
16 asserted in the action; (iii) counsel's knowledge of the applicable law; and (iv) the resources that
17 counsel will commit to representing the class." The Court has already appointed Spector Roseman &
18 Kodroff and Cohen Milstein as interim co-lead counsel and Lief Cabraser as interim liaison
19 counsel, Dkt. 47 at 3-4, and affirmed that appointment at preliminary approval, Dkt. 178 at 3.

20 At initial appointment, the Court considered the submissions and arguments of all of the
21 parties before it and deemed interim co-lead counsel and interim liaison counsel best suited to
22 protect the interests of the proposed class. Since that time, these counsel have capably managed this
23 complex litigation and negotiated a settlement that will provide important injunctive relief and fund
24 substantial work to prevent further intrusions on internet privacy. The work counsel have done to
25 date supports the conclusion they should be appointed as Class Counsel, as the Court initially found
26 at the preliminary approval stage. *See Harrington v. City of Albuquerque*, 222 F.R.D. 505, 520
27 (D.N.M. 2004). The firms satisfy the criteria of Rule 23(g)(1).

1 **C. The Proposed Settlement Is Fair, Reasonable, and Adequate**

2 Under Rule 23(e)(2), the Court may approve the settlement “only after a hearing and only on
3 finding that it is fair, reasonable, and adequate.” Where, as here, “the settlement takes place before
4 formal class certification, settlement approval requires a ‘higher standard of fairness.’ . . . to ensure
5 that class representatives and their counsel do not secure a disproportionate benefit ‘at the expense of
6 the unnamed plaintiffs’” *Lane v. Facebook, Inc.*, 696 F.3d 811, 819 (9th Cir. 2012) (quoting *Hanlon*,
7 150 F.3d at 1026-27). Rule 23 as recently amended sets forth enumerated factors the Court must
8 consider, each of which is discussed below. Fed. R. Civ. P. 23(e). In considering the fairness of a
9 negotiated settlement, the Court should be guided by the “strong judicial policy that favors
10 settlements, particularly where complex class action litigation is concerned.” *Hyundai*, 926 F.3d at
11 556 (quoting *Allen v. Bedolla*, 787 F.3d 1218, 1223 (9th Cir. 2015)). The proposed settlement is fair,
12 reasonable, and adequate under the new Rule 23(e) factors, as well as other relevant considerations
13 identified by the Ninth Circuit.¹¹

14 **(1) Rule 23(e)(2)(A): The Class Representatives and Class Counsel Have**
15 **Vigorously Represented the Class**

16 Rule 23(e)(2)(A) requires the Court to consider whether “the class representatives and class
17 counsel have adequately represented the class.” The Advisory Committee Notes explain that this
18 subsection, in conjunction with subsection (B), “identify matters that might be described as
19 ‘procedural’ concerns, looking to the conduct of the litigation and of the negotiations leading up to
20 the proposed settlement.” *See* Fed. R. Civ. P. 23, Notes of Advisory Comm., Subdivision (e)(2),
21 Paragraphs (A) and (B) (2018). As an “example, the nature and amount of discovery in this or other
22 cases, or the actual outcomes of other cases, may indicate whether counsel negotiating on behalf of
23 the class had an adequate information base.” *Id.* Ninth Circuit law, too, instructs courts to consider
24 the “extent of discovery completed and the stage of the proceedings.” *See Bluetooth*, 654 F.3d at

25 ¹¹ Prior to the recent Rule 23 amendments, the Ninth Circuit instructed courts to weigh some or
26 all of the following factors: “(1) the strength of the plaintiff’s case; (2) the risk, expense, complexity,
27 and likely duration of further litigation; (3) the risk of maintaining class action status throughout the
28 trial; (4) the amount offered in settlement; (5) the extent of discovery completed and the stage of the
proceedings; (6) the experience and views of counsel; (7) the presence of a governmental participant;
and (8) the reaction of the class members of the proposed settlement.” *In re Bluetooth Headset*
Prods. Liab. Litig., 654 F.3d 935, 946 (9th Cir. 2011).

1 946. The extent of the discovery conducted to date and the stage of the litigation are both indicators
 2 of counsel’s familiarity with the case and of plaintiffs having enough information to make informed
 3 decisions. *See, e.g., In re Mego Fin. Corp. Secs. Litig.*, 213 F.3d 454, 459 (9th Cir. 2000).

4 Over nearly a decade of hard-fought litigation, Plaintiffs have vigorously represented the
 5 class. Through a motion to dismiss, an appeal, and extensive jurisdictional discovery, the named
 6 Plaintiffs themselves have participated in the litigation, providing information and other evidence,
 7 including providing electronic devices for forensic imaging, among other duties demanded by the
 8 case. Counsel, experienced class action litigators, have committed thousands of hours of legal
 9 expertise to guiding the litigation through to its present successful settlement. The motion practice
 10 and discovery taken have given ample opportunity to assess the benefits of the settlement relative to
 11 the risks of further litigation. The views of counsel and their intimate knowledge of the strengths and
 12 weaknesses of the case weigh in favor of final approval. *See Bluetooth*, 654 F.3d at 946.

13 **(2) Rule 23(e)(2)(B): Class Counsel Negotiated the Settlement at Arms’**
 14 **Length**

15 Counsel aver that the settlement was negotiated at arms’ length, as required by Rule
 16 23(e)(2)(B). Joint Decl. ¶ 21. Nevertheless, the Court must make its own determination, particularly
 17 when cases settle before certification of a class. *In re Google Referrer Header Privacy Litig.*, 869
 18 F.3d 737, 741 (9th Cir. 2017), *vacated and remanded on other grounds*, 139 S. Ct. 1041 (2019). The
 19 Court must “account[] for the possibility that the class representatives and their counsel have
 20 sacrificed the interests of absent class members for their own benefit.” *Id.* (quoting *Lane*, 696 F.3d at
 21 819); *see also Bluetooth*, 654 F.3d at 946-47. Moreover, Counsel are mindful that a *cy pres* only
 22 recovery, though it may be (as here) the only practicable means of providing benefit to the class,
 23 may “‘present a particular danger’ that ‘incentives favoring pursuit of self-interest rather than the
 24 class’s interests in fact influenced the outcome of negotiations.’” *Lane*, 696 F.3d at 833 (Kleinfeld,
 25 J., dissenting) (quoting *Dennis v. Kellogg Co.*, 2012 WL 2870128 at *6 (9th Cir. July 13, 2012),
 26 *opinion withdrawn and superseded*, 697 F.3d 858, 867). Counsel are thus at pains to present
 27 objective indicia that the settlement was negotiated at arms’ length and is not collusive.

28 The first indication that the settlement was reached at arms’ length is that it is a substantial

1 recovery in light of the risks of the case, and the *cy pres* mechanism involved is necessary in light of
2 the difficulty and expense in identifying Class Members who could plausibly receive a cash
3 recovery. This point is addressed in further detail below.

4 The *Bluetooth* Court noted that a sign of collusion is “when counsel receive a
5 disproportionate distribution of the settlement, or when the class receives no monetary distribution
6 but class counsel are amply rewarded.” 654 F.3d at 947 (quoting *Hanlon*, 150 F.3d at 1021). In
7 *Bluetooth*, a *cy pres* award of \$100,000 was accompanied by an agreement not to oppose attorneys’
8 fees of up to \$800,000 for class counsel. *Id.* Here, counsel seek 25% of the \$13 million common
9 fund plus reasonable expenses, in line with the guidance laid out in *Bluetooth*. *Id.* at 942, 945: *Cf.*
10 Fee Pet. at 1. The reasonableness of this fee is confirmed by Counsel’s lodestar, which is much
11 higher than the fees sought, resulting in a negative multiplier of 0.59. *See* Fee Pet. at 1. Counsel are
12 thus not receiving a “disproportionate” award; and as explained below, the class is receiving no
13 monetary distribution only because such a distribution would be impossible for many Class
14 Members and too expensive to implement for the few who could be identified. Moreover, the *cy pres*
15 funds are not backdoor attorneys’ fees, funneling money to counsel’s alma maters; recipients must
16 be independent groups with a track record of privacy work, and use the funds to promote internet
17 privacy. Agmt. ¶¶ 29-30.

18 Other indicia of collusion include “when the parties negotiate a ‘clear sailing’ arrangement
19 providing for the payment of attorneys’ fees separate and apart from class funds,” and “when the
20 parties arrange for fees not awarded to revert to defendants rather than be added to the class fund.”
21 *Bluetooth*, 654 F.3d at 947. Neither sign is present here. The Settlement Agreement leaves attorneys’
22 fees and service awards entirely to the discretion of the Court, to be deducted from the common
23 fund. Agmt. ¶ 16. And after deduction of Court-determined attorneys’ fees, expenses, and service
24 awards, all funds will go to *cy pres* recipients, and none to Google. Agmt. ¶¶ 24, 53.

25 Here, the settlement was reached only after years of litigation, intensive jurisdictional
26 discovery, and hard-fought settlement negotiations spanning five months. The parties’ agreement in
27 principle was reached in a mediation, with full briefing, before an experienced, respected mediator.
28 Joint Decl. ¶ 20. Though not dispositive, that fact weighs “in favor of a finding of non-

1 collusiveness.” *Bluetooth*, 654 F.3d at 935. More importantly, the result was achieved by adequately-
 2 informed expert litigators whose incentives were aligned with the interests of the class to seek as
 3 large a recovery as possible under the circumstances. That the recovery cannot be directed as a
 4 monetary benefit to individual Class Members is not a sign of a collusive deal between counsel and
 5 the Defendant; rather, it reflects a serious risk of the case—the difficulty of matching intercepted
 6 communications to particular, identifiable Class Members—that both justifies a *cy pres* award and
 7 militates toward a finding of fairness. The settlement here was not only made at arms’ length, it
 8 represents a good deal for the class under the circumstances. More on this below.

9 **(3) Rule 23(e)(2)(C): The Relief Provided by the Settlements Represents a**
 10 **Strong Recovery, Taking into Account the Costs, Risks, and Delay of**
 11 **Trial and Appeal**

12 Rule 23(e)(2)(C) asks the court to consider whether “the relief provided for the class is
 13 adequate,” taking into account four enumerated factors.

14 **a) Costs, Risks, and Delay of Trial and Appeal**

15 The first factor—“the costs, risks, and delay of trial and appeal”—mirrors the Ninth Circuit’s
 16 prior consideration of the risk, expense, complexity, and likely duration of further litigation, while
 17 also examining the strength of plaintiffs’ case, the risk of maintaining class action status throughout
 18 the trial, and the amount offered in settlement. *See Bluetooth*, 654 F.3d at 946 (listing factors).

19 The *cy pres* settlement provides a strong recovery for the class in light of these factors.
 20 Although Plaintiffs’ case had many strengths—among them the large number of potential Class
 21 Members, a body of uncontested facts concerning Google’s conduct, and the possibility of statutory
 22 damages after a successful trial—continuing the case also presented very considerable risks, even
 23 beyond the inherent unpredictability of class action and trial practice.

24 First, key legal and legal-factual questions remain in dispute concerning whether Google’s
 25 conduct violated the ECPA. These include whether Google “intentionally” “intercept[ed]” the
 26 “contents” of Plaintiffs’ electronic communications within the meaning of the Act, with potential
 27 disputes between the parties over the proper interpretation of each term; and, separately, whether
 28 payload data transmitted over unencrypted wireless networks is “readily accessible to the general
 public” because no special effort has been made to encrypt the network’s transmissions. *See* 18

1 U.S.C. §§ 2510(4), 2511(1)(a), (g). Google could also argue that some portion of the intercepted
2 communications were directed at Google servers, and that it is exempt from liability for that portion
3 under § 2511(2)(d), which exempts from liability “a party to the communication” or those to whom
4 “one of the parties to the communication has given prior consent to such interception.” Though
5 Plaintiffs believe they would prevail on each of these questions, serious legal questions such as these
6 present substantial risk. Even reaching these questions would entail substantial additional time and
7 expense, weighing in favor of the settlement.

8 Second, this Court has interpreted the ECPA to limit the Court’s discretion to a choice
9 between awarding damages in the full statutory amount of \$10,000 (per Class Member) or awarding
10 no statutory damages at all. *See Campbell v. Facebook, Inc.*, 315 F.R.D. 250, 268 (N.D. Cal. 2016)
11 (quoting *DirectTV, Inc. v. Huynh*, 2005 WL 5864467, at *6 (N.D. Cal. May 31, 2005). This binary
12 all-or-nothing choice is committed to the Court’s discretion, and dramatically exacerbates the risk of
13 further litigation. The Court might view statutory damages as excessive for most Class Members and
14 decide to award statutory damages only to Class Members experiencing the most egregious
15 intrusions, or to no Class Members at all. If the case were to proceed, it is possible that Class
16 Members could succeed on the merits of the case and still receive no monetary relief whatsoever.

17 Third, any further litigation would likely add years to a litigation that has already proceeded
18 for nearly a decade, for uncertain gains. This is a litigation risk for Class Members, whose ability to
19 establish a claim could depend on rapidly-dwindling sources of data and long-obsolete computer
20 hardware, such as individual Wi-Fi router information from (in some cases) more than a decade
21 past—an eternity in computer hardware lifespans. It is also a fundamental detriment to the class, in
22 that, all else equal, earlier certain relief is preferable to uncertain future relief. Thus, the settlement
23 balances potential recovery for the class against the substantial costs, risks, and delay of trial and
24 appeal, and the \$13 million *cy pres* fund represents a substantial benefit to the class.

25 ***b) Effectiveness of Distribution***

26 Rule 23(e)(2)(C) also instructs the Court to consider the “effectiveness of any proposed
27 method of distributing relief to the class, including the method of processing class-member claims.”
28 The proposed *cy pres* awards are the most effective means of providing benefit to the class.

1 Absent an effective and efficient means of identifying Class Members, the settlement fund is
 2 “non-distributable,” and courts have consistently held that *cy pres*-only settlements provide the next-
 3 best means of providing relief to the class. *See, e.g., Lane*, 696 F.3d at 819-822 (approving *cy pres*-
 4 only settlement in privacy class action against Facebook); *Google Referrer*, 869 F.3d at 741; *In re:*
 5 *Google Inc. Cookie Placement Consumer Privacy Litig.*, 934 F.3d at 320-21, 328 (approving *cy*
 6 *pres*-only settlement in 23(b)(2) class action involving alleged privacy violation); *In re Netflix*
 7 *Privacy Litig.*, 2013 U.S. Dist. LEXIS 37286, at *20 (N.D. Cal. Mar. 18, 2013) (*cy pres*-only
 8 settlement approved where given “sheer size” of class, settlement amount would “be nullified by
 9 distribution costs”); *In re Google Buzz Privacy Litig.*, 2011 WL 7460099, at *4 (N.D. Cal. June 2,
 10 2011) (*cy pres*-only settlement approved); Am. Law Inst., Principles of the Law of Aggregate Litig.
 11 (2010) § 3.07(c) (“ALI”) (“If the court finds that individual distributions are not viable . . . the
 12 settlement may utilize a *cy pres* approach.”). Indeed, this accords with the view expressed by
 13 multiple courts of appeal that “*cy pres* distributions are most appropriate where further individual
 14 distributions are economically infeasible.” *In re Baby Products Antitrust Litig.*, 708 F.3d 163, 173
 15 (3d Cir. 2013); *accord Klier v. Elf Atochem North America, Inc.*, 658 F.3d 468, 475 & n.15 (5th Cir.
 16 2011); *In re Pharm. Indus. Average Wholesale Price Litig.*, 588 F.3d 24, 33-34 (1st Cir. 2009);
 17 *Masters v. Wilhelmina Model Agency, Inc.*, 473 F.3d 423, 436 (2d Cir. 2007); *Powell v. Georgia-*
 18 *Pacific Corp.*, 119 F.3d 703, 706 (8th Cir. 1997); *Mace v. Van Ru Credit Corp.*, 109 F.3d 338, 345
 19 (7th Cir. 1997); *New York v. Reebok Int’l Ltd.*, 96 F.3d 44, 49 (2d Cir. 1996).¹²

20 That is the situation here. While the size of the potential class here is massive, the identities
 21 of those absent members are completely unknown to the parties. The only way to identify
 22 prospective Class Members would involve combing through nearly 300 million frames of collected
 23 payload data and trying to associate it with individual Class Members. Generally, the only ready
 24

25 _____
 26 ¹² Indeed, the Supreme Court has recognized that the *cy pres* solution reflects “[t]he essence of
 27 equity jurisdiction”: “the power of the Chancellor to do equity and to mould each decree to the
 28 necessities of the particular case,” *United States v. Noland*, 517 U.S. 535, 540 (1996) (quoting *Hecht*
Co. v. Bowles, 321 U.S. 321, 329 (1944))—especially relevant because Rule 23 too “stems from
 equity practice,” *Amchem Products Inc. v. Windsor*, 521 U.S. 591, 613 (1997); *accord Ortiz v.*
Fibreboard Corp., 527 U.S. 815, 832- 33 (1999) (describing Rule 23’s equitable “roots”).

1 means of associating such data with Class Members is through the MAC address of the router or
2 other device in question (usually printed on the device). Indeed, the parties' experience with the
3 Special Master process used to conduct jurisdictional discovery for the Named Plaintiffs
4 demonstrates just how complex, expensive, and time-consuming it could be to search the Street
5 View database to identify Class Members eligible for possible direct distributions. As this Court
6 recognized, that process was the search for "a needle in the haystack." Dkt. 121 at 1. Applying that
7 search to a class of millions would be a daunting and expensive prospect.

8
9 Any attempt to provide payments to individual Class Members would first require an
10 elaborate and expensive verification inquiry, whereby potential Class Members would have to
11 provide information such as their personal email addresses and wireless network identifiers (MAC
12 addresses and SSIDs) in use between 2007-2010. No doubt, many Class Members have long since
13 discarded the relevant equipment, which would leave them unfairly shut out from sharing in the
14 settlement proceeds. After that, for any prospective Class Members that could come forward with the
15 necessary equipment, a claims administrator would need to conduct searches into the Street View
16 Data in an effort to find scraps of possible payload data and to determine their legal and factual
17 significance. At best, this process would leave only *de minimis* distributions to the small percentage
18 of Class Members who could and would provide the necessary identifying information, which would
19 serve only to arbitrarily and minimally reward the few Class Members who happen to have retained
20 outdated computer equipment. See *Lane*, 696 F.3d at 821 (affirming *cy pres* only settlement where
21 "direct monetary payments . . . would be *de minimis*").

22 In these circumstances, as in the cases discussed above, *cy pres* is the best way to ensure that
23 the class as a whole benefits from the settlement and that the goals of the litigation are met. Rather
24 than spending the bulk of the Settlement Fund to identify absent Class Members and administer
25 claims that at best would benefit a tiny fraction of the class, the *cy pres* mechanism uses as much of
26 the fund as possible to benefit the entire class by funding Internet privacy watchdogs and educators.

27 The *cy pres* fund also better serves the deterrent *and* compensatory functions of class action
28 litigation. See *Six (6) Mexican Workers v. Ariz. Citrus Growers*, 904 F.2d 1301, 1306 (9th Cir. 1990)

1 (“[W]here the statutory objectives include enforcement, deterrence or disgorgement, the class action
2 may be the ‘superior’ and only viable method to achieve these objectives, even despite the prospect
3 of unclaimed funds.”); *cf.* 18 U.S.C. § 2511(c) (providing for disgorgement remedy). Here, Class
4 Members did not generally suffer economic damages, and none were sought in this class action;
5 rather, the ECPA’s statutory damages seek to compensate Class Members for an intangible invasion
6 of their right to privacy and deter such invasions with a monetary penalty. A *cy pres* settlement that
7 directly funds privacy work will vindicate Class Members’ privacy rights by educating and
8 protecting the public, serving the compensation goal more effectively than a *de minimis* check; and
9 will also deter future abuses by advancing good policy and holding wrongdoers to account. *See*
10 *Hughes v. Kore of Indiana Enter., Inc.*, 731 F.3d 672, 676 (7th Cir. 2013) (“A foundation that
11 receives \$10,000 can use the money to do something to minimize violations of the [statute]; as a
12 practical matter, class members each given \$3.57 cannot.”). The \$13 million Google will pay,
13 meanwhile, has the same deterrent value for would-be privacy intruders regardless of how it is
14 distributed.

15 ***c) Terms of Proposed Attorney’s Fees***

16 A third factor to be considered under Rule 23(e)(2)(C) is “the terms of any proposed award
17 of attorney’s fees, including timing of payment.” Here, while the Settlement Agreement does not
18 contemplate a specific award of attorney’s fees, it does provide that any Court-awarded fees will be
19 paid from the Settlement Fund. Agmt. ¶ 16. As detailed in their Fee Motion, Plaintiffs have
20 requested a total award of \$3.25 million in attorneys’ fees, 25 percent of the total recovery in this
21 case (and the Ninth Circuit’s presumptive benchmark, *see Hyundai*, 926 F.3d at 570). Plaintiffs
22 propose no timing provisions of concern to the fairness analysis. *See* William B. Rubenstein, 4
23 *Newberg on Class Actions* § 13:54 (5th ed. 2019 update) (“*Newberg*”).

24 ***d) Agreements Under Rule 23(e)(3).***

25 Rule 23(e)(2)(C)(iv) requires the Court to consider agreements that must be identified under
26 Rule 23(e)(3). This provision is aimed at “related undertakings that, although seemingly separate,
27 may have influenced the terms of the settlement by trading away possible advantages for the class in
28 return for advantages for others.” *See* Fed. R. Civ. P. 23(e) 2003 Advisory Committee Notes.

1 Plaintiffs have entered into no such agreements.

2 **(4) Rule 23(e)(2)(D): The Settlements Treat Class Members Equitably**
 3 **Relative to Each Other**

4 Finally, Rule 23(e)(2)(D) directs the Court to consider whether “the proposal treats class
 5 members equitably relative to each other.” Here, the class consists of individuals who are similarly
 6 situated as to their claims, their potential recoveries, and the difficulties of establishing their
 7 membership in the class. Those similarly-situated Class Members each enjoy the benefit of identical
 8 injunctive relief and benefits conferred by *cy pres* recipients in furthering their mission to protect
 9 internet privacy. There are no conflicts of interest among the Class Members. *Cf. Newberg* § 13:56.

10 **(5) The *Cy Pres* Awards Will Further the Underlying Interests of the Statute**
 11 **and of the Absent Class Members**

12 In addition to the ordinary requirements for approving a class settlement, the Ninth Circuit
 13 requires “*cy pres* awards to meet a ‘nexus’ requirement by being tethered to the objectives of the
 14 underlying statute and the interests of the silent class members.” *Google Referrer*, 869 F.3d at 743.
 15 “[T]he court should not find the settlement fair, adequate, and reasonable unless the *cy pres* remedy
 16 ‘accounts for the nature of the plaintiffs’ lawsuit, the objectives of the underlying statutes, and the
 17 interests of the silent class members.’” *Lane*, 696 F.3d at 819-20 (quoting *Nachshin v. AOL, LLC*,
 18 663 F.3d 1034, 1036 (9th Cir. 2011)). This analysis guards against “nascent dangers to the fairness
 19 of the distribution process,” including a selection process that may “‘answer to the whims and self
 20 interests of the parties, their counsel, and the court.’”¹³ *Nachshin*, 663 F.3d at 1038-39.

21 The *cy pres* awards proposed here were intentionally designed to fit the nexus requirement.
 22 The Settlement Agreement requires that *cy pres* recipients be “independent organizations with a
 23 track record of addressing consumer privacy concerns” that “shall commit to use the funds to

24 _____
 25 ¹³ The Settlement Agreement guards against the prospect of self-interested awards not only by
 26 adhering to a tight nexus with the case, but also with procedural protections: under the terms of the
 27 Settlement Agreement, the groups must be “independent,” and are selected by the Court from
 28 proposals made by Plaintiffs’ counsel. Agmt. ¶¶ 11-12, 29-30. Google is given no veto on any
 proposed group. *Id.* ¶ 29. Google represents that all distributions are additional to its other charitable
 donations and exercises no control over any expenditure of *cy pres* funds. *Id.* ¶¶ 25, 31. Class
 members have been informed of potential *cy pres* recipients via the settlement website, and the
 parties have disclosed all potentially relevant connections with proposed recipients.

1 promote the protection of Internet privacy.” Agmt. ¶¶ 29-30. This directly addresses the subject
2 matter of the lawsuit—intrusion by Google into consumers’ electronic communications, in violation
3 of the ECPA. The *cy pres* proposals take three complementary approaches to promoting the
4 protection of Internet privacy—first, by educating consumers, and empowering them to protect
5 themselves from intrusive corporations (*see, e.g.*, Dkt. 166-1 Ex. I); second, by promoting law and
6 policy regimes that better protect consumer privacy (*see, e.g.*, Dkt. 166-1 Exs. B,C,H); and third, by
7 educating computer programmers and engineers to incorporate consumer privacy into their design
8 approaches, preventing future corporate abuses of consumer privacy. (*see, e.g.*, Dkt. 166-1 Ex. D).
9 These approaches are directly tied to the gravamen of the suit, the privacy-protective objectives of
10 the ECPA, and the interests of the Class Members whose communications were intercepted.

11 *Compare Google Referrer*, 869 F.3d at 743-44 (privacy groups meeting nexus requirement) *with*
12 *Nachshin*, 663 F.3d at 1039-41 (no nexus between suit alleging unlawful insertion of advertisements
13 into email and awards to local Legal Aid group, local Boys and Girls Clubs, and Federal Judicial
14 Center Foundation).

15 Each proposed *cy pres* recipient is an independent organization with a track record of
16 promoting consumer privacy. They range from specialist policy experts and privacy educators to
17 household names reaching millions. After distribution to named recipients, the remainder of the
18 settlement fund will be distributed through a non-profit professional grantmaking organization
19 targeted directly at Internet privacy. *See* Dkt. 166-1 Ex. G. Most have received privacy-related *cy*
20 *pres* funds in the past, and used them effectively. *See* Dkt. 166-1 Exs. C, E-J. The Court may be
21 confident that each proposed recipient will use *cy pres* funds to further the interests addressed by the
22 lawsuit and of the silent Class Members.

23 Some authority suggests the Court should not order a *cy pres* remedy “if the court or any
24 party has any significant prior relationship with the intended recipient that would raise substantial
25 questions about whether the selection of the recipient was made on the merits.” *ALI* § 3.07 cmt. b;
26 *see Google Referrer*, 869 F.3d at 744 (discussing *ALI*). No such relationship exists. Both Plaintiffs’
27 and Defendant’s counsel have litigated with proposed recipient ACLU or its affiliates on several
28 occasions, and Defendant’s counsel has donated money to ACLU affiliates in the past *see* Dkt. 166-1

1 Ex. H, Dkt. 171 ¶ 5; Google has previous donative relationships with four proposed recipients. Dkt.
 2 171 ¶¶ 6-8. None of these relationships rises to the level of “significant prior relationship.” First,
 3 Plaintiffs’ counsel alone selected the proposed recipients and made no changes on Google’s behalf.
 4 Joint Decl. ¶ 24. *Compare Google Referrer*, 869 F.3d at 744-45 (approving recipients in spite of a
 5 requirement for Defendant’s approval). Second, “[g]iven the burgeoning importance of Internet
 6 privacy, it is no surprise that Google has chosen to support the programs and research of recognized
 7 academic institutes and nonprofit organizations. . . . These earlier donations do not undermine the
 8 selection process.” *Id.* at 745. Third, the ACLU is a broad civil liberties organization with a
 9 longstanding litigation practice; its presence in courts is ubiquitous, and counsel’s relationships with
 10 it are unremarkable. Indeed, it is ACLU’s work pursuing privacy through the courts that qualifies it
 11 for an award. *See* Dkt. 166-1 Ex. H. “Most importantly, there was transparency in this process, with
 12 the proposed recipients disclosing” their relationships and notice provided to the class. *Id.*

13 The Court should find that the proposed *cy pres* awards have an appropriate nexus with the
 14 case, the ECPA, and the silent Class Members and approve the settlement.

15 **(6) The Reaction of Class Members to the Proposed Settlement Favors Final**
 16 **Approval**

17 In addition to the enumerated fairness factors of Rule 23(e)(2), Ninth Circuit courts typically
 18 consider “the reaction of the class members [to] the proposed settlement.” *See Bluetooth*, 654 F.3d at
 19 946; *see also Greer v. Dick’s Sporting Goods, Inc.*, 2019 WL 4034478, at *2 (E.D. Cal. Aug. 27,
 20 2019) (noting that 2018 rule amendments were not intended to displace traditional considerations).
 21 Here, following an extensive notice program consisting of hundreds of millions of individual
 22 advertising impressions, as of filing only one potential class member has excluded them self and
 23 none have objected. Young Decl. ¶¶ 11-12. This reaction strongly favors approval of the settlement.

24 **D. Plaintiffs Have Provided Adequate Notice Under Rule 23(b)(3)**

25 Class actions brought under Rule 23(b)(3) must satisfy the notice provisions of Rule 23(c)(2),
 26 and upon settlement, “[t]he court must direct notice in a reasonable manner to all class members who
 27 would be bound by the proposal.” Fed. R. Civ. P. 23(e)(1)(B). Rule 23(c)(2) prescribes the “best
 28 notice that is practicable under the circumstances, including individual notice to all members who

1 can be identified through reasonable effort.” Fed. R. Civ. P. 23(c)(2)(B). Recent amendments
2 emphasize that “notice may be by one or more of the following: United States mail, electronic
3 means, or other appropriate means.” *Id.* “To satisfy Rule 23(e)(1), settlement notices must ‘present
4 information about a proposed settlement neutrally, simply, and understandably.’” *Hyundai*, 926 F.3d
5 at 567 (quoting *Rodriguez v. W. Publ’g Corp.*, 563 F.3d 948, 962 (9th Cir. 2009)). “Notice is
6 satisfactory if it ‘generally describes the terms of the settlement in sufficient detail to alert those with
7 adverse viewpoints to investigate and to come forward and be heard.’” *Id.* (citation omitted).

8 The notice campaign approved by the Court in its preliminary approval order has been
9 successful. A.B. Data, the Court-appointed settlement notice administrator, presented more than 560
10 million ad impressions to potential Class Members. Young Decl. ¶ 5. The advertisements directed
11 potential Class Members to a settlement website that presented key information about the case and
12 links to key documents. *Id.* ¶ 6. A.B. Data also disseminated a news release in English and Spanish
13 to more than 10,000 newsrooms. *Id.* ¶ 8. The notice program generated 122,954 unique hits on the
14 settlement website, and 53 inquiries via phone and email. *Id.* ¶ 10. In her attached declaration, the
15 experienced notice administrator attests that the notice program has reached an estimated 70% of
16 Class Members. *Id.* ¶ 14. In sum, the administrator attests that the notice program complies with
17 requirements of Rule 23 of the Federal Rules of Civil Procedure. *Id.*

18 The content of the notice also satisfies the Rule 23 requirements, discussed in *Hyundai*.
19 Neutral, simple, and understandable, the notice informed Class Members of the nature of the action,
20 the terms of the proposed settlements, the proposed *cy pres* recipients, the effect of the action and the
21 release of claims, and Class Members’ right to exclude themselves and their right to object to the
22 proposed settlement. The notice program complied with all the requirements of Rule 23.

23 **E. Defendant Has Provided Notice Under the Class Action Fairness Act**

24 Notice under the Class Action Fairness Act was sent to state and federal officials on
25 November 19, 2019. Young Decl. ¶ 9; *see* 28 U.S.C. § 1715(d). No Attorneys General have
26 submitted statements of interest or objections in response to these notices.

27 **IV. CONCLUSION**

28 The Court should certify the Settlement Class and approve the proposed settlement.
